Art Unit: 2814

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 13-25, drawn to a semiconductor device, classified in Class 257, subclass 152.

II. Claims 1-12, drawn to a process for using a semiconductor device, classified in Class 250, subclass 1+.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the product as claimed can be used in a materially different process, for example the transistor in claim 13 is not used to reset the pixel in claim 1.

Because these inventions are distinct for the reasons given above and, as shown by the above different classifications, the fields of search are not co-extensive and separate examination would be required, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.
